个人博客**api**

注：后台返回前台的接口格式为：

```
{
  succeed: true,
  errorCode: -1,
  message: null,
  data: {
    // 响应具体格式，各个接口各不相同
  }
}
```

收藏夹相关

获取收藏的某个类别文章列表：

- **method**：get
- **uri**: /api/collected_articles/{tag}
- **parameters**: start,num
- **sample**:

```
request: get api/collected_articles/javaScript?start=1&num=2
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
   // 响应具体格式，各个接口各不相同
 }
}
```

获取收藏的某个类别文章的数量：

- **method**：get
- **uri**: /api/collected/{tag}/num
- **parameters**:null
- **sample**:

```
request: get api/collected_articles/javaScript/num
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
```

获取收藏的文章的内容：

- **method**：get
- **uri**: /api/collected_articles/{tag}/{articleId}
- **parameters**: null
- **sample**:

```
request: get api/collected_articles/javaScript
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
}
```

原创文章相关

获取原创文章列表

- **method**：get
- **uri**: /api/original_articles
- **parameters**: start,num

- **sample**:

```
request: get /api/original_articles?start=1&num=3
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
   // 响应具体格式，各个接口各不相同
 }
```

添加原创文章

- **method**: post
- **uri**: /api/original_articles
- **parameters**:null
- **sample**:

```
request: post /api/original_artilces
        body:{
            title:'title',
            author:'aurthor',
            content:'content'
        }
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
   // 响应具体格式，各个接口各不相同
 }
```

获取原创文章数量

- **method**：get
- **uri**: /api/original_articles/num
- **parameters**: null
- **sample**:

```
request: get /api/original_articles/num
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
}
```

获取原创文章内容

- **method**：get
- **uri**: /api/original_articles/{articleId}
- **parameters**: null
- **sample**:

```
request: get /api/original_articles?start=1&num=3
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
}
```

获取评论列表

- **method**：get
- **uri**: /api/original_articles/{articleId}/comments
- **parameters**: start,num
- **sample**:

```
request: get /api/original_articles/1/comments?start=1&num=2
response:
 {
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
}
```

添加评论

- **method**: post
- **uri**: /api/original_articles/{articleId}/comments
- **parameters**:null
- **sample**:

```
request: post /api/original_artilces/1/comments
        body:{
            owner:2,
            content:'content'
        }
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
}
```

获取评论数量

- **method**：get
- **uri**: /api/original_articles/{articleId}/comments/num
- **parameters**: start,num
- **sample**:

```
request: get /api/original_articles/1/comments/num
response:
 {
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    num:5
 }
}
```

获取回复列表

- **method**：get
- **uri**: /api/comments/{commentId}/replys
- **parameters**: start,num

- **json sample**:

```
request: get /api/comments/1/replys?start=1&num=2
response:
 {
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
```

添加回复

- **method**: post
- **uri**: /api/comments/{commentId}/replys
- **parameters**:null
- **sample**:

```
request: post /api/comments/1/replys
         body:{
              responder:5,
              owner:2,
              content:'content'
         }
response:
{
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
```

用户相关

登录接口

- **method**：post
- **uri**: /api/user/login
- **parameters**: null

- **json sample**:

```
request: post /api/user/login
              body:{
                    nickname:'helloWorld',
                    password:'123456'
              }
response:
 {
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
```

注册接口

- **method**：post
- **uri**: /api/user/register
- **parameters**: null
- **json sample**:

```
request: post /api/user/register
              body:{
                    nickname:'helloWorld',
                    password:'123456'
                    email:'1608272694@qq.com'
              }
response:
 {
   succeed: true,
   errorCode: -1,
   message: null,
   data: {
       // 响应具体格式，各个接口各不相同
 }
```

获取与用户相关的消息(回复，评论)

- **method**：get
- **uri**: /api/user/:userId/messages
- **parameters**: start,num
- **json sample**:

```
request: get /api/user/1/messages?start=1&num=2
response:
 {
 succeed: true,
 errorCode: -1,
 message: null,
 data: {
    // 响应具体格式，各个接口各不相同
 }
```
